

2026-2027 Integrated Healthcare Management - BAS Proficiency Courses

The following is a list of courses that meet the Proficiency Requirements for the Integrated Healthcare Management (IHCM-BAS) degree program. A combined total of 60 credits from the classes listed below, or an approved substitution, will be needed to graduate. If you completed a prior version of a course and the course code has now changed, the prior version will also be accepted as proficiency. The same is true for courses previously listed on prior versions of this document. Only one career and college success course will be counted toward proficiency. Students with certain, active Washington State Department of Health credentials may be eligible for [license-based credit](#). Equivalent proficiency courses from other institutions and degree programs may be determined through the transcript evaluation process and/or meeting with the IHCM BAS Program Manager.

Addiction Studies Program Courses

- SHS 104 - Introduction to Addiction Studies
- SHS 222 - Pharmacology & Pathogens in Addiction Treatment
- SHS 225 - Group Counseling for Substance Use Disorders
